

CNC - CONTOUR CUTTING

Customised shaped products made from cross-linked or non cross-linked foams of various densities for cushion, shock absorption, protective packaging, as well as various flotation applications.

APPLICATIONS

- Space fillers: To ensure products are snugly packaged preventing damage during transportation and storage.
- Load spreaders: Protection against impact at certain points, spreading the shock over a large area.
- Cushion packaging: Protection against shock and vibration.
- Ideal for applications requiring low surface abrasion and packaging of fragile products such as military equipment
- Various flotation devices for marine and water applications.

ADVANTAGES

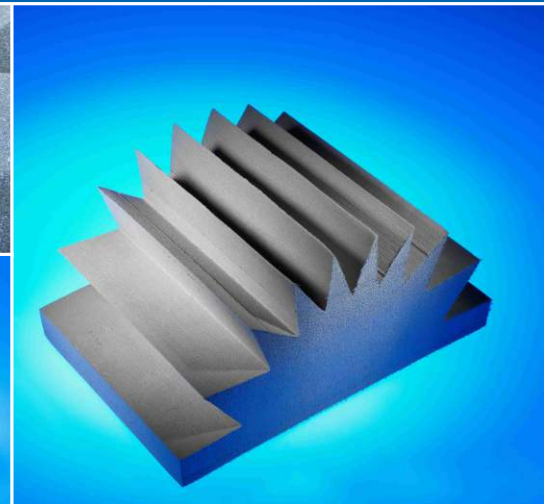

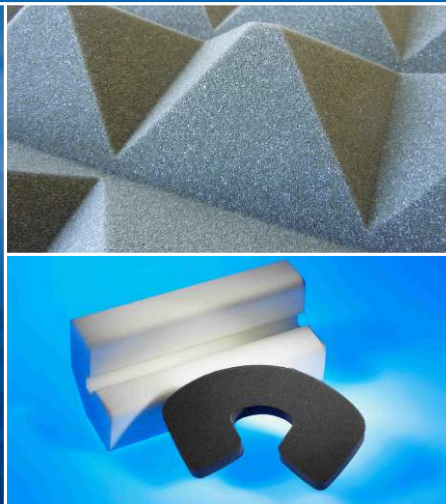

- Sondor has highly versatile fabrication processes for solving many packaging applications.
- High quality finish and edging adds value to the presentation of products.
- The range of foams has excellent shock absorption, vibration damping, insulation and buoyancy characteristics, as well as aesthetically appealing qualities.

- The foams are resilient, compressible and light weight.
- Specialists available to assist with design, layout and choice of materials.
- Any custom profile can be shaped out of a variety of our foam. And any profile up to 1m x 1m in 2m lengths.

DESIGN CRITERIA

- Designs can either be supplied in the form of CAD drawings or drawn up by our in-house staff.
- Specifications of product and casings can be supplied and the layout designed in-house.
- Technical data sheets of all Sondor foams can be supplied or accessed on our website: www.sondor.co.za
